

EXPERIMENT 2

Setting up a Zoho Creator account and exploring the platform architecture and interface.

Name: Ashika K

Roll No: 240701053

1. AIM :

To set up a Zoho Creator account, create a sample Order Management System application, and explore the creation of forms, reports, dashboards, and the Develop, Deploy, and Manage sections of the Zoho Creator platform.

2. SETTING UP ZOHO CREATOR :

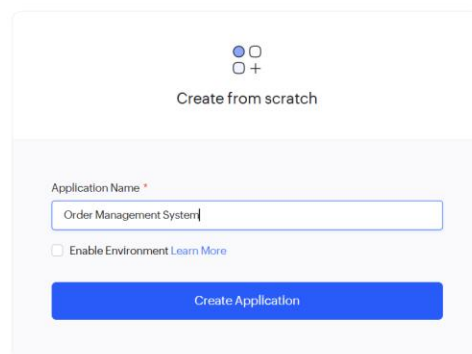

D) Create the Sample Application

Application Name: Order Management System

Zoho Creator is a low-code application development platform used to create customized business applications. A sample Order Management System was created to manage customer orders, items, quantities, prices and payment details.

×

A screenshot of the Zoho Creator 'Create from scratch' form. At the top, there are two icons: a blue circle with a white square inside, and a white square with a blue plus sign. Below these icons is the text 'Create from scratch'. The form has a light gray background. In the center, there is a text input field with the label 'Application Name *' above it. The input field contains the text 'Order Management System'. Below the input field, there is a checkbox labeled 'Enable Environment' and a link 'Learn More'. At the bottom of the form, there is a blue button with the text 'Create Application'.

Order Details Form

The Order Details form is used to collect and store order information.

Steps :

1. Open Order Management System application.
2. Go to Create From Scratch.
3. Select Create Form.
4. Enter the form name: Order Details
5. Add the fields

Submit

Explanation:

The Order Details form collects important information about customer orders. The submitted information is stored in the application database and can be viewed through the Order Report.

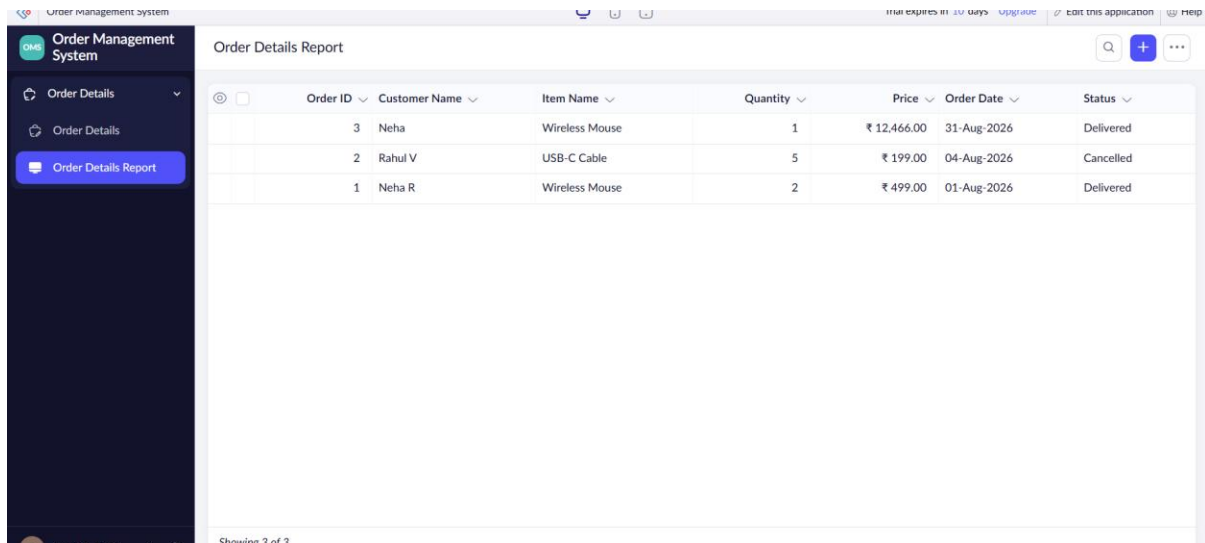

II) Creating Reports

Reports are used to display and organize the data submitted through forms.

The Order Report displays all the order records entered through the Order Details form.

After creating the form:

1. Go to Reports.
2. Click Create Report.
3. Select Order Details as the form/data source.
4. Give the report name: Order Report
5. Select the fields to be displayed
6. Save the report.

The screenshot displays the 'Order Management System' interface. On the left, a dark sidebar contains a menu with 'Order Details' and 'Order Details Report' (highlighted in blue). The main area is titled 'Order Details Report' and features a table with the following data:

	Order ID	Customer Name	Item Name	Quantity	Price	Order Date	Status
	3	Neha	Wireless Mouse	1	₹ 12,466.00	31-Aug-2026	Delivered
	2	Rahul V	USB-C Cable	5	₹ 199.00	04-Aug-2026	Cancelled
	1	Neha R	Wireless Mouse	2	₹ 499.00	01-Aug-2026	Delivered

At the bottom of the table, it says 'Showing 3 of 3'.

Explanation:

The Order Report displays all the order records submitted through the Order Details form. It provides a structured view of order information and makes it easier to view, search and manage records.

III) Creating Dashboard

A dashboard was created to provide a graphical overview of the Order Management System. The dashboard contains information such as Total Orders Last Month.

1. Go to Pages in your application.
2. Click Create Page.

3. Select Blank Page.
4. Name it: Order DashBoard
5. Add a Panel/Chart component.
6. Select Order Details as the data source.

×

Create New Page

Name page

Create Page

Explanation:

The Order Management Dashboard provides a quick overview of important order information. Panels and summary components are used to represent data visually. It helps administrators monitor order activities efficiently.

3. EXPLORING THE PLATFORM ARCHITECTURE AND INTERFACE

Develop

1. Zoho Creator provides a low-code development environment for creating applications using forms, reports, pages and workflows.
2. Users can design application components using a simple drag-and-drop interface with minimal programming.

3. The Develop section is used to create, customize and test the application before deployment.

Deploy

1. The Deploy section is used to make the developed application available to end users.
2. Administrators can configure user access, permissions and application availability.
3. The deployed application can be accessed through supported web and mobile interfaces.

Manage

1. The Manage section is used to manage application settings, users, permissions and data.
2. Administrators can monitor and maintain the application after it has been deployed.
3. It also allows application components and configurations to be modified whenever required.

RESULT

Thus, an Order Management System was successfully created using Zoho Creator. A form for orders was created along with a corresponding report and a dashboard. The Develop, Deploy and Manage sections of the Zoho Creator platform architecture and interface were also explored successfully.
